**[Senior Instructor - Geomatics](#)** - My alma-matter, The University of Victoria (Victoria, BC, Canada) is searching for a candidate to fill this 4 year term appointment. Candidates must hold a minimum of a Master's degree in geomatics and have teaching experience at the post-secondary level. Info is also available from the U. Vic Geography website [office.geog.uvic.ca](http://office.geog.uvic.ca)

### **Safe Software Releases FME Suite 2003 X2**

FME Suite 2003 X2 is a Spatial ETL (Extract, Transform, Load) tool that makes it easy for

organizations to translate, transform, share and enhance their data between over 100 GIS, CAD, and database formats.

### **GiveMePower And Tripod Data Systems Team Up To Deliver Bundled CAD And GPS Solutions For Surveying, GIS, Construction, Military And Public Safety Applications**

Field-Based Solutions Combine AutoCAD® Compatible Mobile Design Software With GPS Viewing And Navigation On New ReconT Ruggedized Pocket PC

### **ArcPad StreetMap Now Available**

New Extension Offers U.S. Street-Level Data, Geocoding, and Routing for Your Mobile Workforce

### **URISA-ON Recognizes The City of Hamilton, Ontario with Awards for Web and Mapping Projects Using Intergraph's Solutions**

City of Hamilton's interactive Web site and maps recognized for excellence in use of geospatial technology

### **ImageLinks and CAE Forge Long-Term Agreement**

ImageLinks creates TrueTerrain products by merging and mosaicking multi-source, multi-resolution satellite and aerial imagery on an elevation surface to provide realistic, geospecific terrain features.

### **FLUG 2003 Summer Conference Kicks off US Bentley-Sponsored FORUM Events**

Several MicroStation V8, GEOPAK and user sessions are on the agenda

### **BAA Standardizes on Autodesk Building Design Application for Major New Passenger Terminal at London's Heathrow Airport**

Use of Autodesk Architectural Desktop Software Improves Design Efficiency on One of the Largest Current Construction Projects in the United Kingdom

### **Canadian Space Agency Awards \$116 Million Contract for International Space Station Robotics**

As part of this contract administered by Public Works and Government Services Canada, MDA will provide software maintenance and enhancement for orbiting Canadian robotic components, and the development, testing and integration of Dextre

### **Autodesk Location Services Powers the First Wireless Car Navigation System Now Available in the New Fiat Punto**

Owners of the Fiat Punto with the New CONNECT Off Board Navigation System Can Get Routing, Traffic and Directory Services with Just the Push of a Button

The advertisement features a photograph of a smiling man with glasses looking at a computer screen. Below the photo, a white banner contains the text: "We've created the perfect GIS for Billy." The logo "AnyGIS" is prominently displayed, with "Any" in a stylized font and "GIS" in a bold, blue font. Below the logo, the text reads: "Enabling Any Spatial Data to Anyone... Anywhere". At the bottom of the advertisement, the text "Hitachi Software Global Technology" is written in a bold, red font.

**Around-the-web** - According to the [Guardian](#), Researchers at Carnegie Mellon University plan to release software later this summer that, according to computer models, can forecast the number and types of crimes that will occur within a 10-block area, with a 20 percent error rate. News from down-under, After an extensive voyage from Hobart to Freemantle the Murray Canyons have now been mapped and other important scientific data was also collected - see details from [ABC W. Qld](#)

## SUGGESTED READING

[GIS in the Classroom: Using Geographic Information Systems in Social Studies and Environmental Science](#) - Marsha Alibrandi takes us to the cutting edge of teaching social studies and environmental education using Geographic Information Systems (GIS). A computer application for urban planning, weather reporting, and geological and demographic studies, GIS has been increasingly employed by teachers to help students improve their geographical and critical thinking skills. Alibrandi presents an overview of this technology and examples of how it can transform your classroom. Geography is everywhere and so is GIS! GIS is just the right tool for students to explore, question, integrate, analyze, interpret, evaluate, and act on information. Alibrandi offers stories of teachers and students from the U.S. and Canada who have harnessed the power of GIS to conduct original research.
