

Map.Hamilton – User Testimonials

James Goodram - Planner I- Downtown Renewal Division, Planning and Development Department, City of Hamilton

"I use and direct the public and potential investors to the Downtown Renewal section of Map.Hamilton.ca on a daily basis to provide accurate, current and timely information on Downtown properties. This site provides information on the properties such as lot area, frontage, current use, bus routing, sewer and watermain sizes and location together with not only aerial photography but even a picture of the building on site."

Philip A. Homerski - Communications Officer for World & Community Events and Major Projects, Communications Division, Office of the City Manager, City of Hamilton

Re: 2003 National Cycling Championships - Information for Residents

"The maps contained on this site have been of tremendous help to City staff and race organizers alike in communicating very complex information to residents and anyone who does business in Hamilton. I am particularly impressed with the clarity and functionality of the maps. The ability to print these maps that contain critical event and temporal-specific information has been extremely helpful to City departments, race organizers and end users alike."
